

GROUND GOLF CATALOG 2025

YURIHAMA MACHIZUKURI Co.,Ltd.

From the Birthplace of Ground Golf to the GG Enthusiasts Around the World ~ Yurihama, Tottori Prefecture, Japan ~

Since its creation in 1982 in the town of Yurihama (formerly Tomari), ground golf has become a sport loved by many people. Along with ground golf's increase in popularity, the technology and skill that has gone into the manufacturing of the clubs, balls, and other equipment, has also greatly improved over the years.

With the cooperation of the manufacturers of the Japan Ground Golf Association's equipment, Yurihama, the birthplace of ground golf, is pleased to help make this equipment available to overseas GG enthusiasts at a special discounted price. We invite you to try this high-quality equipment, which brings together the manufacturing capabilities developed and honed in the country that brought you the sport itself.

We hope that we will be able to further expand the circle of friendship and promote healthy lifestyles through ground golf!

YURIHAMA MACHIZUKURI Co.,Ltd.

How to Place an Order

- ① Please describe your desired product in English or Japanese on the "Order Form"(Page 3 of the catalog).
Please email "Order Form" to the Yurihama Machizukuri Company at the following email address:
[yurihama.ground.golf@gmail.com]

The Yurihama Machizukuri Company will contact you and let you know whether the merchandise is available and in-stock.

After confirming the contents of your order and the items available,
please inform the Yurihama Machizukuri Company of your final order.

The Yurihama Machizukuri Company will then send you the "Order Confirmation Form".
The bank details for necessary for payment will be listed on the "Order Confirmation Form".
Please complete payment in Japanese yen.

Once payment is confirmed, we will arrange the product.
Therefore, it takes about one or two weeks from the completion of payment to the shipment of the product.

Once all the items you ordered have arrived from the manufacturer to us, we will ship the items to you.

Important Notes

- *Products are basically sent by Japan Post airmail. However, if Japan Post airmail cannot be used, the shipping method will be changed. We can also send by sea mail, so please let us know if you would like to do so. (*Only for countries where sea mail is available)
- *You will be responsible for any bank charges incurred in your country and Japan and the intermediary bank.
- *Customers are responsible for any fees incurred during customs clearance.
- *For airmail, it takes about 1-6 weeks for the package to arrive at your country's customs after being shipped from Japan. For sea mail, it can take 3-4 months depending on the country.
- *We(Yurihama Town Hall) will bear the shipping fee for the time being, with the feeling of gratitude for your purchase.

Yurihama-cho
(formerly Tomari-son)

Ground golf mecca “Shiokaze no Oka Tomari” - Hill of the Sea Breeze -

Ground golf was established in 1982 in Yurihama-cho (formerly Tomari-son) as part of a lifelong sports promotion program. Since the rules are simple and no particularly advanced skills are required, it has spread as a sport that can be enjoyed by both children and adults, and has developed into a national pastime with over 3 million enthusiasts in Japan. Built on a small hill overlooking the Sea of Japan, “Shiokaze no Oka Tomari” is considered the mecca for ground golf, and in recent years it has hosted 200 tournaments annually, including international and birthplace tournaments.

To further expand the circle of health and friendship from its birthplace “Yurihama-cho,” we have prepared a lineup of GG equipment.

THE ROOTS of GROUND GOLF are in TOMARI.

ROOTS *in* HERE

The ROOTS in HERE series incorporates the beauty of nature such as the tides, the wind, and the hilly terrain into its design based on the motif of “Shiokaze no Oka Tomari.” The club head is designed to evoke the gentle topography of a hilly terrain, and the cavity shape is reminiscent of a terraced course, expressing the strength of nature, while the shaft and other design features evoke the flow of the tides and wind, expressing the suppleness of nature.

This series will inspire a new sense of excitement in your play while you experience the natural surroundings of the birthplace of ground golf.

3D CLUB

01 2-HOLD GRIP FOR EASY CONTROL

By enlarging the grip end, it prevents slipping out and enhances the hold feeling during the swing.

02 EASY TO GRIP FOR ANYONE WITH COUNTERBALANCE

By lowering the head balance, it improves the operability and the goodness of the swing, leading to a stable swing.

03 3D SHAFT WITH NEW FACE BALANCE SYSTEM

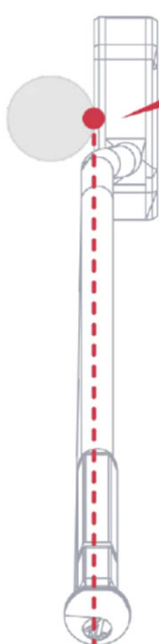

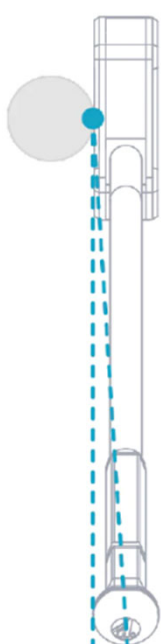

By making the shaft a three-dimensional structure, it is possible to directly approach the sweet spot during the swing.

04 HUMAN ENGINEERING SMOOTH HEAD

A smooth swing is achieved with a shape that allows you to hold the club at any angle and a sole that has a calculated swing angle.

Conventional Straight Club

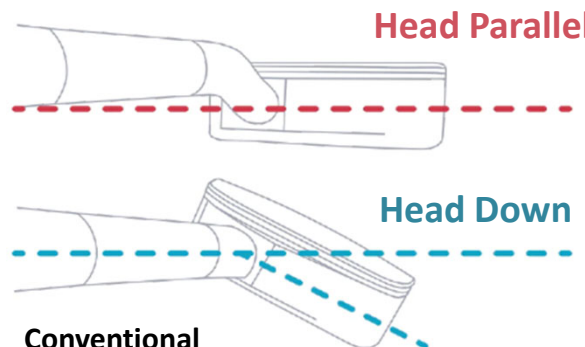

ASPRYER 3D Club

Improved Visibility

The shaft has a three-dimensional structure. Therefore, compared to conventional products, the core and the striking surface can be visually recognized straight.

ASPRYER 3D Club

Conventional Straight Club

The three-dimensional structure makes the face evenly balanced and the head parallel. It becomes easier to make a stable swing.

CLUB

Club List	Face	Feature	Weight
3D PERSIMMON MASTER EDITION BH2921 NEW  P20	Carbon TPU	The top-of-the-line club Persimmon is now equipped with a 3D shaft using patented technology for improved surface stability. A top-of-the-line club for more accurate shots at greater distances.	Around 710g In case of 84cm
Persimmon Classic 5 BH2914  P20	Carbon TPU	Equipped with a 3-layer face made of carbon sandwiched between TPU. Powerful hitting by utilizing the weight of the club.	Around 650g In case of 84cm
Ultimate Urethane Club 2 BH2882  P21	Urethane Foam	Thick, soft face for a bouncy ball feel. The large sole and scratch-resistant face provide a sturdy design that can withstand hard use.	Around 635g In case of 84cm
NAVIGATION DRIVE CLUB BH2864 NEW  P22	TPU	Next generation standard club with high distance performance TPU face and low price.	Around 615g In case of 84cm
Straight Drive Club 2 BH2857  P22	TPU	The jagged structure inside the 2-layer TPU face increases the repulsive performance. Excellent directional performance with a target line that makes it easy to aim at the ball.	Around 610g In case of 84cm
Karin Club 6 BH2896  P23	TPU	Harder and heavier than Persimmon, made of famous Pear wood. Duraface with two layers of hard grade TPU material for a pleasant hitting sound.	Around 640g In case of 84cm
Powered Sole Club 3 BH2863  P23	Glass Fiber TPU	Equipped with a 3-layer face made of fiberglass sandwiched between TPU. T-shaped head with low center of gravity makes it easy to aim straight.	Around 625g In case of 84cm
Double Force Club BH2875  P24	Hard Carbon Soft Urethane Foam	A club for the technically inclined with a hard face and a soft face on both sides. You can choose the type of club you want to use depending on the situation.	Around 610g In case of 84cm
Impact Slugger BH2501  P24	Bakelite	Entry model with slender shaft. Equipped with a hard bakelite face. Features an exhilarating clack sound.	Around 615g In case of 84cm

Carbon

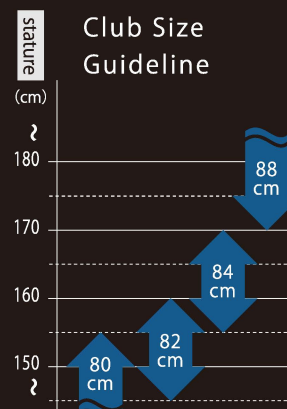

Hard face featuring a high pitched, pleasant hitting sound and good ball release. The protective coating on the surface is hard to deteriorate, making it easy to hit on turf fields.

TPU

New material face that combines a good hitting feel with a firm hitting sound and resilience. It also has excellent scratch resistance and can be used in any field. Higher repulsive performance is achieved by varying the hardness and by sandwiched different materials inside.

Urethane Foam

Soft face that reduces impact on the hand and provides a good hitting feel. High scratch resistance makes it strong on dirt and gravel grounds.

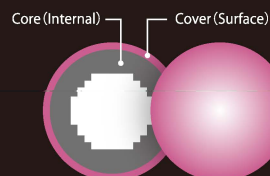

Since there are individual differences in physique, please use this information only as a reference when you are not sure which club to choose.

BALL

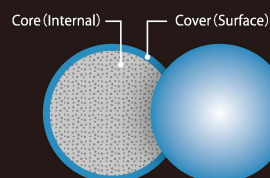

Ball List	Structure	Weight
AERO BALL BH3861 NEW  P27	Hollow	Around 94g
Navigation Ball BH3851  P28	Hollow	Around 94g
WIN4 BH3433  P29	Solid	Around 94g
Light 76 BH3412  P29	Solid	Around 76g
Shoot Ball BH3460  P30	Solid	Around 94.5g
Color Ball BH3001 NEW  P30	Solid	Around 94g

Hollow

The center of the ball is hollow. The hollow center of the ball makes the outside of the ball heavier, so centrifugal force acts on it when it rolls, and it rolls well. In order to maintain strength, a hard and rigid resin is used, making the ball very responsive.

Solid

This ball is filled with resin all the way to the center of the sphere. It is characterized by its vivid color. The inner core repels and rolls powerfully. The hardness of the resin between the inner core and the cover layer that covers it can be varied to create a ball with good feel.

Ball Handling

- Do not use for any purpose other than ground golf.
- Store in a place away from direct sunlight.

Concentrated blows may cause rapid wear.

Do not use deteriorated or scratched items.

After use, wipe off any dirt thoroughly.

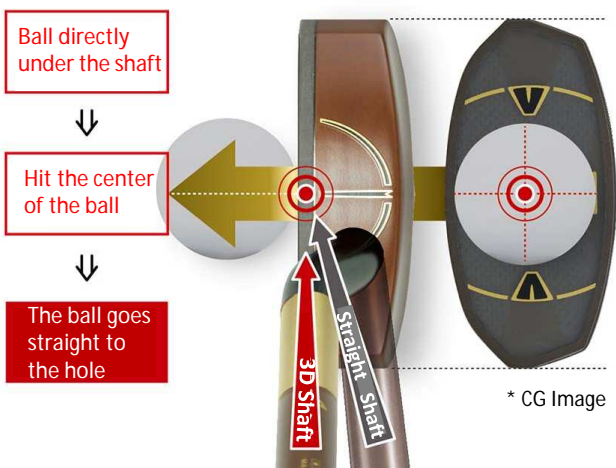

NEW 3D PERSIMMON MASTER EDITION

BH2921 29,520 JPY

[MATERIAL] HEAD : persimmon, carbon, TPU, brass
 SHAFT : maple tree, brass pipe,
 GRIP : TPV, magnet(grip with marker holder)
 WEIGHT: about 710g (84cm) PLACE OF PRODUCTION : Japan
 *JGGA certified product
 * Marker is sold separately.

POINT 1 3D shaft = The ball hits right in the center

Equipped with a patented 3D shaft technology. Striking point on the shaft extension, allowing you to hit the ball with the center axis of your body.

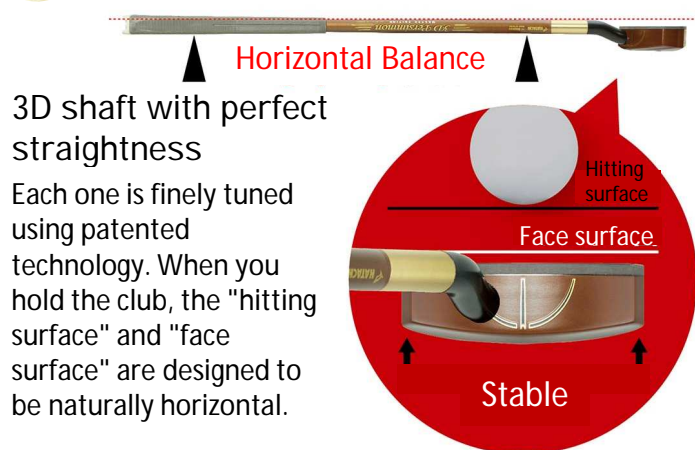

A marker can be attached to the end of the grip.

NEW AERO BALL

BH3861

1,230 JPY

SIZE: 60mm WEIGHT: about 94g

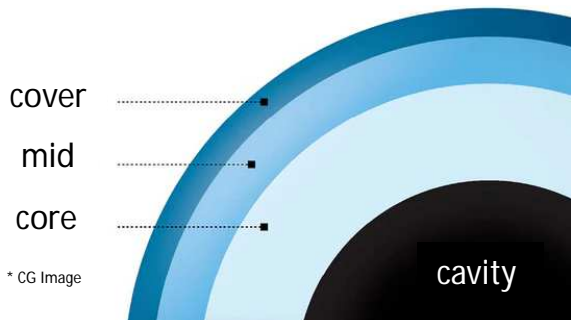

[MATERIAL] Special synthetic resin

PLACE OF PRODUCTION: Japan JGGA certified product

POINT
1

Get more distance! New 3-layer structure

The core is made of highly resilient resin, which provides great distance. The mid is made of resin that provides a good hitting feeling, and the cover is made of highly abrasion-resistant resin, making this the first new 3-layer structure for Hatachi.

02 clear

27 blue

35 green

45 yellow

54 orange

62 red

64 pink

68 purple

POINT
2

Hollow structure for maximum distance

The ball has no blades and is empty at the center, improving its rolling performance. The weight distribution is also evenly balanced, resulting in a ball with a more refined roll.

Moment of inertia
*According to our research

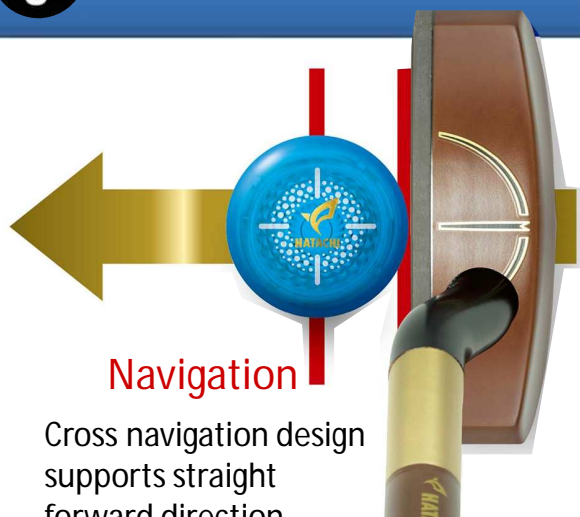

Hollow structure

The outside is heavier, so more centrifugal force is exerted
